NO

If NO, please explain how item will be funded:

Executive Summary:

The existing concrete roadway on Walnut Drive between Oak St. and 19th St. has deteriorated to a state of necessary repairs. To assist with the reconstruction costs the City received \$90,000 from Kane County as part of their Community Development Block Grant program.

Walnut Drive from Oak St. to 19th St. is a two-phase reconstruction program. This first phase of construction extends between Oak St. and slightly north of the of the main driveway entrance to the multi-unit development off of Walnut Drive. The first phase of construction was completed in 2010. The second phase of construction begins at the termination point of the first phase of construction and continues to the intersection of Walnut Drive and 19th St.

In an attempt to minimize inconveniences to the neighboring school, staff has prepared an expedited schedule to assure that substantial completion of the project is met prior to November 15, 2011, weather permitting. Construction activities will consist of roadway removal and replacement, installation of new 6" storm sewer services stubs, replacement of storm sewers, respective structures, lateral crossings, public sidewalks, and driveway apron removal and replacement. The Public Works Engineering Staff prepared the engineering plans and specifications for the project, and bids were requested. A bid opening is scheduled to be held at 10:00 am September 13, 2011.

Engineer's estimate is: \$289,404

Results of the bid opening and recommendation to be presented at meeting.
